

Isaac Palomo Salas

QA Automation Engineer | Full-Stack Developer

hello@isaacpalomo.com | +52 657 196 7040 | isaacpalomo.com | github.com/isaacpalomo

Summary

QA Automation Engineer and Full-Stack Developer with experience developing and maintaining automated end-to-end tests using Playwright. Background in Angular, Java Spring Boot, and modern web application development, with hands-on experience improving application reliability and test coverage in production systems.

Work Experience

Full-Stack Developer (QA Automation) | Enhance Fitness

Feb 2022 - May 2026

Remote

- Developed and maintained Playwright end-to-end automated tests for Angular-based web applications
- Validated critical user workflows including scheduling, booking, and trainer management features
- Investigated CI pipeline failures and analyzed logs to identify and fix failing Playwright tests
- Collaborated with developers to identify, reproduce, and resolve frontend and backend defects
- Contributed to full-stack feature development using Angular and Spring Boot

Full-Stack Developer | Build IT Solutions

Mar 2019 - Jan 2022

Remote

- Developed and maintained web applications and backend services for logistics and real estate platforms
- Designed and implemented REST APIs and full-stack features from requirements to delivery

Web Developer | Cadena de Proveedores de la Industria en México

Jan 2017 - Feb 2019

Ciudad Juárez, México

- Maintained and extended a PHP/MySQL platform, implementing features for product catalogs and user interactions
